

Seamless Cost Savings

Reduce Food-Related Costs in the Office

How does Seamless save you money?

- » Enforce all budget and ordering rules
- » Reduce administrative costs
- » Prevent over-ordering and waste
- » Capture billing information, including client codes
- » Eliminate absorption of billable costs
- » Boost employee productivity and morale

Cost Savings by the Numbers*:

Employees spend an average of **31% less time away from work** if they order food to the office.

On average, it costs **\$12.31** to process each employee expense report. Imagine eliminating that expense for each employee.

Clients report that Seamless saves them over **9 minutes each day** that's over **40 hours per year** per employee.

10-30%

Seamless saves companies **10-30% annually** on food-related costs..

Catering users estimate that by using Seamless, they cut **in half the time** it takes them to order.

BMO  **Capital Markets**

"Processing hundreds of expense reports for overtime meals was challenging. Staff were often disregarding our time restrictions and going over their meal budget by an average of \$1.50 per meal when charging meals to a corporate card. Today, with Seamless in place, our Accounting team processes about 250 fewer expense reports per month, but more impactful is the cost savings the company has experienced thanks to the meal spend rules in place.

*Based on a survey of Seamless clients.
